Profile

Aspiring Software Engineer with hands-on experience in web development, AI-driven applications, and software testing. Proficient in Java, Python, and full-stack web technologies, with a proven ability to deliver scalable projects and contribute to product improvements. Passionate about building data-driven solutions, open-source contributions, and leveraging AI/ML to solve real-world problems.

Education

Vellore Institute of Technology Bhopal, India
Bachelor of Technology in Computer Science Aug. 2023 – May 2027
Major in Artificial Intelligence and Machine Learning

Experience

Web Developer | Draftwise Legal **Remote**
Intern **July 2025 – December 2025**

- Designed, developed, and deployed a portfolio website for a legal firm, improving online client engagement by 30%.
- Implemented responsive front-end (HTML, CSS, JavaScript) and integrated backend workflows for dynamic content.
- Optimized website performance and ensured secure hosting practices, reducing page load time by ~40%.

AI Tester | Brenin Technologies **Remote**
Intern **May 2025 – July 2025**

- Conducted functional and conversational testing for Amara, a voice-based HR chatbot, ensuring high NLP accuracy.
- Identified and documented 70+ bugs and UX flaws in Jira, leading to a 25% increase in chatbot accuracy and user satisfaction.
- Performed real-world HR scenario testing, covering diverse user intents and improving conversational flow reliability.

Project

Automated Irrigation System | Individual Project  [View Code](#)

AI-powered irrigation system predicting water needs using soil, weather, and crop data for optimized irrigation control.

- Built predictive model in Python using scikit-learn and pandas.
- Developed RESTful API with FastAPI for model integration and real-time insights.
- Created responsive frontend for monitoring and automated scheduling.

AI Rooftop Solar Analyzer | Individual Project  [View Demo](#)

Developed a web-based tool using **JavaScript** and the **Gemini API** to analyse satellite imagery for rooftop solar potential and ROI estimation.

- Integrated **Gemini API** for satellite image retrieval and solar irradiance analysis.
- Implemented algorithms to calculate optimal panel placement, efficiency, and ROI metrics.
- Automated generation of installation recommendations through **data-driven analysis pipelines**.

Technical Skills

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, Fast API, Flutter

Developer Tools: Replit, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Android Studio

Libraries: Pandas, NumPy, Matplotlib, TensorFlow, PyTorch, OpenCV

Other Skills: AWS Cloud Practitioner, Data Structure and Algorithm.
