Profile

Software Engineer with hands-on experience developing and deploying full-stack web applications and improving system performance. Built responsive web interfaces and integrated backend systems, enhancing user engagement and reducing load times. Experienced in Java, Python, React, Node.js, and Firebase, with a strong focus on writing efficient, scalable code and delivered reliable software solutions.

Education

Vellore Institute of Technology Bhopal, India
Bachelor of Technology in Computer Science Aug. 2023 – May 2027
Specialization in Artificial Intelligence and Machine Learning

Experience

Web Developer | Draftwise Legal **Remote**
Intern **July 2025 – December 2025**

- Engineered and deployed a portfolio website for a legal firm, improving online client engagement by 30%.
- Built responsive UI using HTML, CSS, and JavaScript, improving mobile usability by 40% and reducing bounce rate by ~25%.
- Optimized website performance (lazy loading, caching), reducing page load time by 40% and improving Lighthouse score from ~60 → 90+.

AI Tester | Brenin Technologies **Remote**
Intern **May 2025 – July 2025**

- Executed 100+ functional and conversational test cases for an NLP-based HR chatbot, improving response accuracy and intent recognition.
- Identified and documented 70+ bugs and UX issues, contributing to a 25% increase in chatbot accuracy and user satisfaction.

Project

Sport Venue Booking Platform

Built a full-stack sports venue booking platform used to manage 100+ simulated bookings with real-time availability and scheduling.

- Architected scalable full-stack app using React.js, Node.js, and MongoDB, supporting concurrent user requests with <200ms response time.
- Implemented real-time slot booking and authentication system, reducing booking conflicts by ~35%.
- Designed responsive admin dashboard improving booking management efficiency by 40% for venue owners.

Hostel Complaint Management System (NLP-Based)

Developed a web app-based hostel complaint system enabling **real-time complaint registration and tracking**, improving issue reporting efficiency by ~40%.

- Integrated **secure authentication using Firebase and Google OAuth**, ensuring protected access and user-specific complaint tracking.
- Structured backend logic for **complaint categorization and automated routing**, streamlining issue handling across departments.
- Implemented NLP-based classification to automatically categorize complaints, improving sorting accuracy and reducing manual effort.

Technical Skills

Languages: Java, Python, C++, JavaScript, SQL

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Node.js, Express.js, Fast API

Databases: MongoDB, MySQL, Firebase

Tools & Cloud: Git, GitHub, Docker, Vercel, AWS, Google Cloud

Libraries: Pandas, NumPy, OpenCV

Core: Data Structures & Algorithms, REST APIs, OOP
